DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 4, 6-8, 10-14, and 16-18, drawn to a method of obtaining a desired protein from a transgenic host organism by modifying the gas phase surrounding the organism and the transgenic host organism.

Group II, claim(s) 1, 2, 4, 7-14 and 16-18, drawn to a method of obtaining a desired protein from a transgenic host organism by atomizing a solution or suspension and the transgenic host organism.

Group III, claim(s) 1, 2, 4, 10-14 and 16-18, drawn to method of obtaining a desired protein from a transgenic host organism by flooding the organism with a volatile inductor and the transgenic host organism.

Group IV, claim(s) 1, 2, 3, 5, 6, 10-14 and 16-18, drawn to method of obtaining a desired protein from a transgenic host organism using an inductor in liquid phase and the transgenic host organism.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: In this case, the special technical feature in common corresponds to claim 1 in which the expression of a desired protein in a host organism is induced by exposure to a chemical inductor after harvesting. The use of chemical inductors to induce expression fails to represent a contribution over the art. As disclosed by applicant on page 7 of

Art Unit: 1638

the specification, the use of chemical inductors to induce expression of a protein was known in the art. See for example Bulow et al. 1999. This information indicates that the special technical feature, specifically claim 1, does not represent a contribution over the art since it would have been obvious to one of ordinary skill in the art to induce expression during growth of the organism or just after harvesting, while the organism is still capable of protein expression.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
